

FREL.P-044-2

Application number 10/824,200

Concise statement of relevance

An Information Disclosure Statement in this file cites a reference DE19632258 and a reference WO9807260.

The content of both references is summarized in the English abstract of the WO9807260 and concerns a Message Handling System using a special type of acknowledgment ("Quittung") to confirm the receipt of messages. No indication is given of the use of pluggable transport protocol adapters or of splitting a MOM library such that some functions are implemented in a thin client and others in a proxy server.

Respectfully submitted,

/pass/
